NAVIGATING CRITICAL FUNCTIONS

Enrolling to GAFC

Below are some considerations for integrating the online process to your Organization's current workflow:

GlobalApply for Card (GAFC) still requires a Program Administrator to initiate and review applications. In comparison to our previous digital application platform, GAFC enables Users to select whether they want pre-approvals for an application and/or post approvals once the application is complete. See [Selecting the right process journey](#) for more details.

When enrolling to GAFC via the digital enrolment form or our Servicing Team, they will require the Enrollee to be an existing Program Administrator in our systems.

Ensure you at least have two individuals with access to the online system in case of unplanned absences etc.

If you are unsure who is a Program Administrator within your Company you can contact our Program Administrator(PA) Servicing Team who can help you [Enroll to GAFC](#).

[➔ BACK TO CHECKLIST](#)

Reassess who should have access to GAFC

-  How many individuals need to be involved in the end to end application process?
-  How many individuals needs to be involved in the end to end application process? Can you streamline the number of touch-points?
- 
 - i) Do you want Card Applicants to initiate their own applications and you nominate whether approval is required before they complete the form or simply approve them once complete? **Access Keys** might suit you.
 - ii) Do you want to initiate applications each time without needing to approve them once they have been completed? **Quick Send** might suit you.
-  How many pre-approvers are required? Do you want to select them or allow the Applicant to nominate during the form process? See how **Access Keys** can help you.
-  Do you require one **Access Keys** per Departament or one per Team Leader?
-  See the section on **Access Keys** which can help you set up a process with low touch-points but still meet your minimum company approval regulations.

Revisit how employees will access the application form

There are two options for how a Card Applicant (Employee) can access application forms:

1. You can initiate it via @ Work either by setting up an **Access Key** or **Quick Send** features.
2. Employees can initiate their own application using the unique **Access Key** you created and the system will follow the process you have established for approvals.

See which experience suits your **business needs**.

For Employee initiated Applications you need to decide how to communicate this, either:

Provide the **Access Key** via their Manager or their Program Administrator.

Publish the **Access Key** internally e.g. on a Company intranet or in an on-boarding guide*.

* Pre or Post approval set up recommended if Access Key to be easily accessible

Decide who should have access to GAFC

-  Individuals with access to Global Apply for Card (GAFC) will be responsible for ensuring the correct journey is created within @ Work to suit their individual business needs in relation to Card Applications. They may not necessarily have to approve Card Applications, but know who the Authorizing Signatories are for their Company and assign applications to them.
-  It is possible to customize the journey from initiating the Card Application through to how the applications are approved before submitting to American Express. See [Selecting the right process journey](#) for further details.
-  We do recommend that you have more than one individual with access to GAFC and the same Control Accounts. This enables Access Keys and tracking of Card Applications easier as everyone will have the same ability to manage these in the system.
-  Having multiple people with the same access also allows for the process to continue even when the Program Administrator(s) are out of the office for an extended period of time.
-  See [How to Enroll](#) for further details.

[↩ BACK TO CHECKLIST](#)

Define your application process

- ✓ Do you require approval for a Card Application before or after it has been completed by an Applicant?
- 👤 How many individuals need to be involved in the end to end application process? Can you streamline the number of touch-points?
- ⓪ i) Do you want Card Applicants to initiate their own applications and you simply approve them once complete? **Access Keys** will suit you.
- ⓪ ii) Do you want to initiate applications each time without the need to set up an Access Key? **Quick Send** might suit you.
- ⓪ How many pre-approvers are required? Do you want to select them or allow the Applicant to nominate during the form process? See '**What is an Access Key?**'
- ⓪ See the sections on **Access Keys flows** which can help you set up a process with low touch-points but still meet your minimum company approval regulations.
- ⓪ Do you require pre approval or post approvals on your process?
- 👤 How many individuals need to be involved in the process?
- 👤+ Ensure you have two individuals with access to the online system in case of unplanned absences, etc.

Decide how employees will access the application form

There are two options for how a Card Applicant (Employee) can access application forms:

1. You can initiate it via @ Work either by setting up an **Access Key** or **Quick Send** features.
2. Employees can initiate their own application and the system will follow the process you have established for approvals.

See which experience suits your **business needs**.

For Employee initiated Applications you need to decide how to communicate this, either:

-  Provide the **Access Key** via their Manager or their Program Administrator.
-  Publish the **Access Key** internally e.g. on a Company intranet.

[↩ BACK TO CHECKLIST](#)

What is an Access Key?

- ☰ The Access Key defines fields and the process your Card Applications for a specific BCA will follow with no limit to the number of variations these Keys may have.

THE ACCESS KEY CAN BE CREATED TO DETERMINE THE FOLLOWING:

- What approvals are required when and by whom (e.g., Team Leader to approve the application before the employee receives the form and you need to approve it in @ Work once complete before it goes to American Express).
- If there are specific individuals involved with the approval process, where you can add their email address to ensure the application cannot proceed until that person has approved.
- If mandatory information is to be captured on the application, such as employee ID or Cost Center.

BENEFITS OF AN ACCESS KEY:

- Multiple **Access Keys** can be created for the same BCA allowing different options such as application fields and process preferences.
- You can quickly initiate multiple applications with the same **Access Key**.
- You can publish the **Access Key** and application Site URL for your organization on your company's intranet.
- Tighter controls to manage Card applications with reduced manual administration.
- You can easily view all applications and their status under specific **Access Keys** for tracking.

[↩ BACK TO CHECKLIST](#)

Create Access Keys

This is a one time set up and identifies which application form, fields and approval process the Employee will complete before the application is sent to American Express. For more details see **'What is an Access Key?'**

See the process options available for **Access Keys**.

Do you need an **Access Key** for a whole Department or for each Team Leader? For example: One access key for the Sales Team and another for Procurement as they have different approvers or Card products.

Be sure to name the **Access Key** so it is easily identifiable for which Department or Team Leader they are linked to.

Do you require one Access Key per Department or one per Team Leader?

PAs with the same Account access will be able to view and edit Access Keys created by other PAs.

Review steps on **Creating an Access Key**.
