

# Find Resy Restaurants in Claude

The Resy MCP App enables you to **check real-time restaurant availability** directly through Claude, then takes you to the Resy mobile app or website to complete your booking. It uses the Model Context Protocol (MCP) to integrate Resy's live availability data into Claude, so you're always seeing real, bookable reservations — not static suggestions.

## Check Availability

The Restaurant Availability tool retrieves available reservation times for a selected restaurant based on your requested date and party size. It will return available time slots and associated booking options.

### Ask Claude:

- "Can I book Carbone with Resy?"
- "Does Chez Ma Tante have availability for brunch tomorrow?"
- "Help me book a dinner reservation at Torrisi for 2 people on Friday."

### Claude will:

- Fetch live availability
- Show open time slots
- Link you out to the Resy mobile app or website to complete the reservation securely

## How to get started

Claude may suggest Resy when you ask about restaurants or reservations. You can also connect manually in Claude's connectors section.

- Navigate to the **Connectors** section in Claude.
- Search for "**Resy**".
- Tap **Connect**.

You do not need to sign into Resy during setup. If needed, sign-in happens later when you book. Once connected, Claude will automatically call Resy tools when relevant.

**RESY**

## Troubleshooting

### I can't get Claude to display availability

Make sure you include a date, time (or time range), and party size.

Try a different time or restaurant if nothing appears. Inventory can change quickly, and there may not be Resy venues in your area with availability.

If you're still not seeing availability, please note that your experience may be limited by geography, as the initial launch of this tool only supports US-based users.

### I was redirected out of Claude

This is expected behavior. Booking is completed via the Resy mobile app or website.

### My booking wasn't completed

Ensure you finished the booking flow using the Resy mobile app or website.

- If you exited the journey early, the reservation is not confirmed.
- Check your email for confirmation.

## Privacy & Data

No sensitive personal data is shared with Claude. Resy only uses the information needed to show availability and complete your reservation. Booking happens in Resy's secure environment.

## Support

If issues persist, please review the [Resy Help](#) page where you can review additional FAQs and contact us.
