

1. Scope of Application

The Basel Pillar III disclosures contained herein relate to American Express Banking Corp. – India Branch, herein after referred to as “the Bank” for the period ended September 30, 2022. American Express Banking Corp. (AEBC) is organized under the New York State Banking Law and incorporated in the United States of America. AEBC is a wholly owned subsidiary of American Express Company and conducts business through a branch office in India. In India, AEBC holds a banking license issued by the Reserve Bank of India (RBI) and is subject to the provisions of the Banking Regulation Act. The Bank’s operations are confined to two business areas viz. card operations and acceptance of institutional deposits.

The disclosures have been compiled in accordance with Reserve Bank of India’s Master Circular DBR.No.BP.BC. 1/21.06.201/2015-16 dated July 1, 2015 on Basel III Capital Regulations and the amendments thereto issued from time to time.

The Bank does not have any subsidiaries, nor does it hold any significant stake in any companies. Further, the Bank is not required to prepare consolidated financial statements. No quantitative disclosures are required to be made, as the Bank has no subsidiaries. The Bank also does not have any interest in insurance entities.

2. Capital Adequacy

The primary objective of capital management at the Bank is to maintain a consistently strong and flexible capital position and to ensure that the Bank’s capital is of sufficient quality and quantity to meet at a minimum, all regulatory requirements and maintain adequate capital over and above regulatory minimums to act as a safety net for the variety of risks the Bank is exposed to, in its ordinary course of business.

The Bank has established a comprehensive internal capital adequacy assessment process (“ICAAP”) which enables the Bank to set internal capital targets and strategies for achieving those internal targets that are consistent with its business plans, risk profile, and operating environment. This framework facilitates the assessment of the overall capital adequacy of the Bank in relation to its risk profile which includes all material risks faced by the Bank which are not captured by the regulatory minimums prescribed by the regulator. The framework is aimed at ensuring that the Bank’s capital is adequate to address current and future risk and achieve strategic objectives. Key components of the Bank’s ICAAP include: Board and senior management oversight; sound capital assessment and planning; comprehensive assessment of risks, sensitivity and scenario analysis, monitoring and reporting

The Board of Directors is responsible for ultimate oversight of capital management and as such, oversees the annual review and approval of the Bank’s ICAAP, Internal Capital Targets, Capital Plan and ICAAP and Capital Management Policy.

The Bank has implemented a Board approved Stress Testing Framework which forms an integral part of the Bank’s ICAAP. Stress Testing involves the use of various techniques (such as macroeconomic stress testing and event driven scenario / single factor stress tests) to assess the

Bank’s potential vulnerability (profitability and capital impacts) to extreme conditions. Stress tests are conducted on a periodic basis and the stress test results are reported to the India Country Asset Liability Management Committee (ALCO), India Risk Management Committee, Board and other governance committees of the Bank. The Bank periodically assesses and refines its stress tests in an effort to ensure that the stress scenarios capture material risks as well as reflect possible changes in the macro economic conditions. The stress tests are used in conjunction with the Banks business plans for the purpose of capital planning in the ICAAP.

Common Equity Tier I Ratio	18.24%
Tier I Ratio	18.24%
Total Capital Ratio	31.96%

3. Credit Risk - General Disclosures

Credit Risk is defined as the risk of loss to the Bank due to non-payment of amounts that are contractually owed to the Bank. The Bank’s Management and the Board of Directors continuously monitor credit risk to ensure that prudent lending criteria are established and complied with to minimize the Bank's exposure to credit risk. The AEBC Credit Risk Management Committee (CRMC) is responsible for assisting the Bank in carrying out its credit risk management functions and reports to the Board. It has oversight responsibilities for the Bank’s credit risk and for ensuring compliance with all pertinent policies and regulatory requirements. The Bank’s lending is only in relation to card issuance business and loans to staff.

It is the policy of the Bank to:

- Extend Credit only on a safe, sound and collectible basis.
- Extend Credit in an economically sound fashion.

- Extend Credit only in compliance with applicable law and regulations and the policies of the Bank and in full consideration of applicable regulatory guidance.
- Document credit decisions.
- Adopt and use best-in-class risk management tools and practices.
- Require its vendors, including its affiliates, to act in accordance with the policies of the Bank when conducting business on the Bank's behalf.

The Bank has established policies and procedures to control and manage the credit risk. These policies and procedures, in particular:

- Establish the governance structure through which credit risk will be identified, assessed, controlled, monitored and reported.
- Details the credit products and services that the Bank may offer.
- Specifies certain key metrics to be used in managing credit risk.
- Establishes the conditions under which exceptions to credit policy may occur.

Management can never eliminate the Bank's credit risk. However, consistent application of the above practices will result in the credit risk being controlled to an acceptable level. Therefore, Management and the Board of Directors continuously monitor credit risk to ensure that prudent lending criterion are established and complied with so as to minimize the Bank's exposure to credit risk.

The Bank follows the RBI guidelines for asset classification. Accordingly, card receivables are treated as non-performing, if any amount is overdue for a period of more than 90 days.

The Bank also identifies all card accounts with delinquencies and writes off in the books of accounts, the outstanding card receivables which are 210 days past billing. In addition, accelerated write off is effected where it is evident that the outstanding is unlikely to be recovered.

Provision for Non-Performing Assets, Standard Assets and Unhedged Foreign Currency Exposure are made in compliance with the prudential norms prescribed by Reserve Bank of India. Corporate clients who are solely or jointly liable, are classified based on their overdue amounts. In the case of sub-standard assets, in addition to minimum provision requirement prescribed by RBI, the bank makes additional provision based on best estimate of probable losses. Accounts classified as doubtful/loss are provided at 100% till written off. Restructured assets are classified and provided for in accordance with the guidelines issued by RBI from time to time. The Bank holds provisions as at 30th September 2022 against the potential impact of COVID-19 based on the information available at this point in time. The provisions held by the Bank are in excess of the RBI prescribed norms.

4. Credit Risk: Disclosures for Portfolios Subject to Standardized Approach.

The Bank lending business is confined to card lending through its card issuance business and loans to staff. In view of this limited lending activity, the Bank does not use any rating assigned by the eligible external credit rating agencies for measuring credit risk. The card receivables under consumer portfolio are covered under the Specified Category attracting risk weight of 125%, card receivables under corporate portfolio are covered under the Claims on Corporates, AFCs and NBFC-IFCs Category attracting risk weight of 150% and loans to staff attract risk weight of 20% as per the RBI guidelines. All interbank balances with scheduled banks have been reckoned at 20% as per the RBI guidelines, as the counterparty banks have capital adequacy ratio of 9% and above.

Quantitative Disclosure:

Amount of bank's outstanding, by risk weight are as follows:

Risk Weight Applied*	(Amount Rs.'000)
	As at September 30, 2022
Below 100 % risk weight	43,396,441
100 % risk weight	9,608,105
More than 100 % risk weight	37,268,943
Deducted (in computation of Net Owned Funds)	-

* Net of provisions and collaterals

5. Credit Risk Mitigation: Disclosures for Standardized Approach

The Bank's advances arise from its card operations and there are normally no collaterals for these lending. However, in few cases, to mitigate credit risk, the Bank uses Bank Guarantees and Institutional deposits from customers as collaterals.

Quantitative Disclosure:

Rs.'000)	(Amount As at September 30, 2022
Particulars	As at September 30, 2022
Exposure covered by Bank Guarantees	175,008
Exposure covered primarily by Institutional Deposits	229,495

6. Securitization : Disclosure for Standardized Approach

The Bank does not have any securitization exposure.

7. Market Risk in Trading Book

The Bank does not engage in any trading but maintains a portfolio of high quality liquid assets in the form of investments which are limited to GOI Treasury Bills to meet the Statutory Liquidity Ratio (SLR) and Liquidity Coverage Ratio (LCR) requirements. These investments are held under the Available for Sale (AFS) category and do not carry any credit risk. Foreign exchange risk in the banking book is limited and is generated on account of foreign currency denominated exposures in the balance sheet.

The general market risk capital charge towards interest rate risk and foreign exchange risk is provided as per the extant RBI guidelines, using the Standardized Duration Approach. The market risk management architecture is similar to interest rate risk and has been outlined in subsequent sections.

Capital Requirements

	(Amount Rs.'000) As at September 30, 2022
Interest rate Risk	299,486
Equity position risk	-
Foreign exchange risk	194,063

8. Operational Risk

Operational Risk is defined as the risk of not achieving business objective due to inadequate or failed processes, people or information systems, or to the external environment, including failures to comply with laws and regulations. It includes legal risk, but does not include strategic and reputation risks.

The Bank has in place an Operational Risk Management Policy framework that defines the key elements of Operational Risk Management. The Operational Risk Management framework defines governance principles, globally accepted risk assessment methodologies and processes for capturing and analyzing Operational Risk events and exposures. Internal and external drivers shape the framework, including regulatory requirements and market pressures. The framework and its supporting programs are designed to be adaptable to address emerging risks and external influences as they develop.

The Bank has adopted the Basic Indicator Approach (BIA) for measuring the capital requirements for Operational Risk

9. Interest Rate Risk in the Banking Book (IRRBB)

Interest Rate Risk in the banking book is defined as the risk to earnings or risk to the value of assets or liabilities resulting from changes in interest rates. Interest rate risk is primarily generated by funding card member receivables and investments with different tenure of borrowings and deposits. These assets and liabilities generally do not create naturally off-setting positions with respect to re-pricing or maturity characteristics which may lead to changes in the Bank's earnings, net interest income and economic value.

The Bank incurs and accepts Interest rate risk exposure as a necessary accompaniment to its business model, in the regular course of offering its products and services. It does not actively seek to create Interest rate risk exposure in excess of that is incurred through its business model. The Bank's objective is to identify and manage interest rate risk exposures in the context of its overall business model while supporting sustainable earnings growth. This is accomplished by identifying, measuring and reporting such exposures on a monthly basis and managing the same within predefined Board limits.

The Bank measures IRRBB from two separate, but complimentary perspectives i.e. earnings at Risk (EaR) and economic value of equity (EVE). EaR measures the level of the Bank's exposure to interest rate risk in terms of sensitivity of its Net Interest Income (NII) to interest rate movements over a time horizon of 1 year. EVE measures the level of the Bank's exposure to interest rate risk in terms of sensitivity of its market value of equity to interest rate movements using the Duration gap approach. Ear is monitored assuming a 100 bps parallel shift in yield curve, while EVE is measured for a 200 bps parallel shift in yield curve. The Bank also undertakes periodic stress testing to keep the management informed of the potential impacts of extremely adverse interest rate movements.

Liquidity and Funding Risk

The Bank incurs and accepts liquidity and funding risk through its established business model and through the normal course of offering its products and services. The Bank has established

clear objectives for its funding and liquidity management activities and maintains processes to ensure that its liquidity profile continuously remains consistent and compliant with those objectives. The objectives (which also define the liquidity/funding risk tolerance) include, but are not limited to:

- The maintenance of a diversified set of on and off-balance sheet funding sources that utilizes a prudent amount of short-term funding liabilities.
- The maintenance of a cushion of high quality, unencumbered liquid assets to be held against identified funding requirements under stress (as prescribed by the regulator) for a liquidity risk survival horizon of 30 Days.
- The projection of cash inflows and outflows from a variety of sources under various stress scenarios.
- The capacity to conduct a range of hypothetical analyses of changes to funding requirements under stress scenarios.
- A framework for the ongoing identification, measurement, management, and monitoring of liquidity requirements
- Development of a robust Contingency Funding Plan

Liquidity Risk at the Bank is measured using the flow and stock approach. Flow approach involves comprehensive tracking of cash flow mismatches, while stock approach involves measurement of critical ratios in respect of liquidity risk. Additionally, the Bank has a Board approved liquidity stress test framework and maintains a Contingency Funding Plan in the event a material funding or liquidity crisis occurs. The Bank also has a mechanism in place to monitor Intraday liquidity risk.

General principles and the overall framework for managing market risk, interest rate risk, liquidity and funding risk are defined in the Bank's Policies.

Interest Rate Risk, liquidity and funding risk is managed and monitored by the India Country Asset Liability Management Committee (ALCO) of the Bank which is responsible for ensuring adherence to the risk tolerance/limits set by the Board as well as implementing the liquidity and interest rate risk management strategy of the Bank in line with its risk management objectives. The India Risk Management Committee (India RMC) also oversees and monitors interest rate risk, liquidity and funding risk as part of its enterprise wide risk related responsibilities and reports into the Board of the Bank.

Quantitative Disclosure

Impact on earnings and economic value of capital:

As at September 30, 2022
