Explaining Interest Rates

Simple Rates: Your simple interest rate is what we use to work out how much interest you'll be charged each month. It moves in line with the Bank of England Base Rate.

Compounding Interest: We use your simple interest rate to work out the interest we charge you. If you do not pay your balance in full each month we will charge interest on interest. This is called 'compounding'. Because this rate includes the payment of interest on interest, it will be greater than your Simple Rate.
