Good

Your site uses HTTPS.

What has this given you?

1. **Understanding of overall health**
2. **Idea of keyword equity and areas of noise / opportunity**
3. **Authority score**
4. **Percentage score of good URLs on your website**

What do you do with this data?

SEO: Optimisation

Action 1: Address common errors

The most common errors we see are:

- Missing content
- Duplicate content
- 404s
- Broken internal links

The above should be relatively straightforward to fix, depending on your CMS. It will make a big impact to resolve and stay on top of all errors on your website.

Errors (11) ⓘ

[292 internal links](#) are broken [Why and how to fix it](#)

[143 pages](#) have duplicate meta descriptions [Why and how to fix it](#)

[111 hreflang conflicts](#) within page source code [Why and how to fix it](#)

[58 issues](#) with duplicate title tags [Why and how to fix it](#)

[51 structured data items](#) are invalid [Why and how to fix it](#)

[43 pages](#) have duplicate content issues [Why and how to fix it](#)

[37 internal images](#) are broken [Why and how to fix it](#)

[24 links](#) couldn't be crawled (incorrect URL formats) beta [Why and how to fix it](#)

[16 pages](#) returned 4XX status code [Why and how to fix it](#)

[5 pages](#) don't have title tags [Why and how to fix it](#)

[1 page](#) has slow load speed [Why and how to fix it](#)

Action 2: Update your Google MyBusiness

Give Google information to help it's algorithm understand who you are:

- Set up a GoogleMyBusiness
- Populate with all up-to-date information
 - Images
 - Website
 - Phone number
 - Social Media links
 - Map listing

The screenshot shows a Google My Business profile for 'Kasa Chiropractic'. At the top, there are photos of the storefront and a map showing the location. Below the photos, the business name 'Kasa Chiropractic' is displayed with a 4.8-star rating and 163 Google reviews. The address is '33 Alma Vale Rd, Clifton, Bristol BS8 2HL'. The hours are listed as 'Closed' with a dropdown arrow, and the phone number is '0117 574 1501'. There are buttons for 'Website', 'Directions', 'Save', and 'Call'. Below this, there is a 'Questions & answers' section with a 'Ask a question' button. A 'Popular times' bar chart shows activity levels throughout the week, with a peak at 6 pm. There is a 'Send to your phone' button. The 'Reviews from the web' section shows ratings from Facebook (4.8/5) and Yelp.com (5/5). Below this are several customer reviews with star ratings and text. At the bottom, there is a 'From Kasa Chiropractic' section with a quote and a 'People also search for' section with thumbnails for other chiropractic services in the area.

Action 3: Understand your keywords / Share of Voice

- Understanding intent
 - Commercial
 - Transactional
 - Informational
 - Navigational
- Defend
 - Share of Voice
- Grow
 - Striking Distance
- Compete
 - Recognise competitive terms
- Identify
 - New opportunities

Action 4: Keep an eye on the competition

Look for the right opportunities to compete:

- Run similar keyword research on your competition
- Understand what they own by way of search equity
- Decide whether you can compete organically, or whether you need to buy those clicks
- Build a content strategy that will effectively compete for the top positions – coming up later in presentation

The screenshot shows a Google search for "best wellies uk". The search results include several articles and product listings. The UberSuggest extension is visible on the right side of the page, showing a list of product recommendations with images, prices, and ratings.

Action 5: Build a Content Cluster Strategy

A content cluster is a way to optimise a website's structure and internal linking by organising content around topics into pillar and cluster pages:

- Pillar/Hierarchical Pages
- Relevant content/complete resource guides
- Internal linking
 - Keyword rich anchor text
- Helpful content algorithm update

Action 6: Check your On-Page SEO Elements

Recommended SEO On-Page Elements:

- Headers:
 - H1: One `<h1>` `</h1>` tag per page
 - H2: Three `<h2>` `</h2>` tags or less
 - H3: Multiple but used for linking groups/categories
 - H4: If required
- Alt text:
 - On company logo and social profiles.
 - On all images with keyword rich alt text
- Links:
 - 10 - 20 internal links but in support of a pillar strategy
 - 1 - 2 external links
- CTA: This will vary depending on the template
 - CTA above the fold
 - CTA in the middle and bottom of the page
 - Test/adapt CTA

Action 7: Get clever about content

Less is more. Only go after content opportunities that are achievable:

- Understand the competition
 - Volume
 - Intent
 - Keyword difficulty
- Text length
- Semantic keywords
- Backlinks
- Readability

The screenshot shows a web interface for 'SEO recommendations for your content'. At the top right, there are buttons for 'Order content writing', 'Export to DOC', and a location/language dropdown set to 'United States (Desk...)'. The main content area is titled 'Our analysis is based on your Google top 10 rivals' and lists five URLs for 'catering companies'. Below this, a section titled 'Key recommendations (based on your Google top 10 rivals)' provides three categories of suggestions: 'Semantically related words' (including event planning, friends and family, private events, etc.), 'Backlinks' (listing domains like rent-near-me.com, hangar21venue.com, etc.), and 'Readability' (stating an average score of 50). A 'Text length' section recommends 1056 words.

Action 8: Look for opportunities to grow backlinks

Backlinks, inbound links, incoming links, one way links are all links from one website to a page on another website. Pages with a high number of quality backlinks tend to rank well in the search engines.

- PR team
 - Usually only paid PR
 - Request keyword rich anchor text
 - Don't just link to the homepage
- Competitor backlinks
- Partnerships
- Bloggers

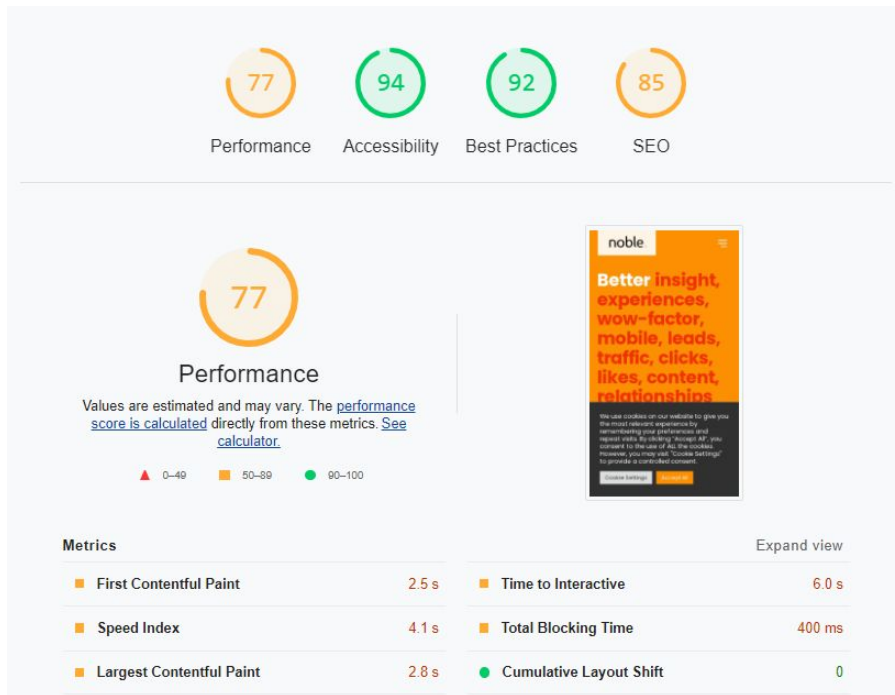

Action 9: Understand Core Web Vitals

Core Web Vitals (CWV) are a set of performance metrics Google developed to measure users experiences on a web page. These metrics specifically measure:

- Loading experience (LCP)
- Interactivity (FID)
- Visual stability (CLS)

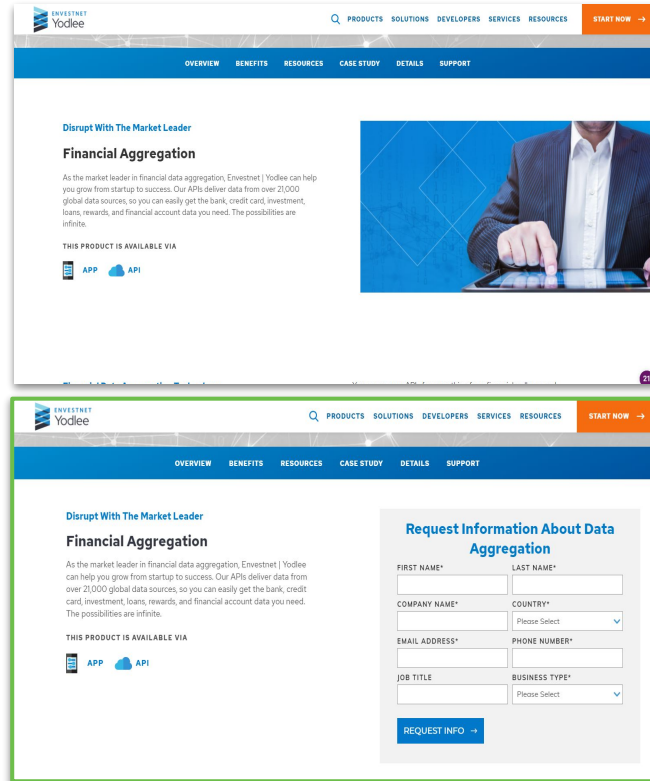

<https://web.dev/measure/>

Action 10: Invest in Conversion Rate Optimisation

Your website should act as an extension of your sales team, with a primary goal of efficiently converting qualified traffic into leads.

Consistently focusing on your conversion experience and conversion rate to capture demand on your website will lead to increased pipeline.

- Integrating different platforms

CONTENT

- Adding or removing pages
- Adding / removing / hiding content
- Consolidating pages / content
- Introducing new languages / locales

STRUCTURAL

- Site hierarchy changes
- Navigation changes
- Internal linking changes
- User journey changes

DESIGN & UX

- UX-driven changes across devices
- Look and feel changes
- Media changes
- Site performance changes

apetito

Search | Paid Social | Website Migration

Noble began working with apetito 9 months ago to support them with an effective lead generation programme. Apart of our recommendation was to re-platform to a website capable of supporting this effort.

The website migration project kicked off in March and we worked with the apetito team on a growth strategy for the migration. We looked at existing equity and opportunity to grow traffic from the launch of the new website.
