* 'In Remediation' status indicates a determination by the Council, after Quality Assurance review, that a QSA organization has violated applicable QSA Validation Requirements. This status may result from failure to comply with any number of applicable QSA Validation Requirements. QSAs are notified when remediation is required, and QSAs listed as "In Remediation" may be actively seeking to remedy this status. For more about remediation please visit https://www.pcisecuritystandards.org/news_events/docs/0904_qsa_remediation_statement.pdf

For information about the status of a particular QSA, please contact that QSA.

** 'In Remediation' status indicates a determination by the Council, after Quality Assurance review, that a QSA organization has violated applicable QSA Validation Requirements. This status may result from failure to comply with any number of applicable QSA Validation Requirements. QSAs are notified when remediation is required, and QSAs listed as "In Remediation" may be actively seeking to remedy this status. For more about remediation please visit https://www.pcisecuritystandards.org/news_events/docs/0904_qsa_remediation_statement.pdf*

For information about the status of a particular QSA, please contact that QSA.

** 'In Remediation' status indicates a determination by the Council, after Quality Assurance review, that a QSA organization has violated applicable QSA Validation Requirements. This status may result from failure to comply with any number of applicable QSA Validation Requirements. QSAs are notified when remediation is required, and QSAs listed as "In Remediation" may be actively seeking to remedy this status. For more about remediation please visit https://www.pcisecuritystandards.org/news_events/docs/0904_qsa_remediation_statement.pdf*

For information about the status of a particular QSA, please contact that QSA.
