INNOVATE

FAST, EFFICIENT PAYMENT PROCESSES WITH AR AUTOMATION

Manual accounts receivable (AR) can slow down payments and lead to extra work for your team.

of those late payments are reported as >30 days past due¹

EVEN WORSE

IT companies are among those spending the most hours per week on accounts receivable (AR) management¹

Nearly one in three IT companies report spending seven hours per week managing AR¹

That may be why **91.2% of CFOs** said digitization of payment processes had a positive impact on efficiency.²

companies report

being paid late1

INNOVATE

Automated AR doesn't just help the finance team. It can also benefit your clients to keep them coming back for more.

When executives at IT companies were asked about the benefits of embedded B2B payments:³

34% said they increased new client acquisition

35% said they increased client tenure

48% said they gave an edge over the competition

That competitive edge can help you bring in more business while lowering costs — a win-win for your working capital.

- Businesses using AR software are 3X more likely to be paid on time⁴
- ► **62%** of surveyed CFOs say digitization programs **helped lower costs**⁵
- ▶ 83% of CFOs surveyed said payments digitization positively impacted working capital management⁶

Ready to Automate AR?
